09. Speak For The Voiceless
10. No Way Out

CTRL – A fiery ride to your inner sun!

With over 10 million streams, the modern metal band **DUST IN MIND** from Strasbourg (France) creates a sound world filled with passion, fire and thunder! Their highly anticipated fourth album 'CTRL' is a wholehearted confirmation that the expansion of **DUST IN MIND** is redoubtable. By channeling their inner fury about the devastating global situation, the band succeeds to unveil a strong and sharp sound which cuts right through your emotions.

An album about courage, surrendering and the intimate process of learning about oneself whilst having to face the overwhelming pressure and torrents of feelings that seem uncontrollable and incomprehensible.

'Lost Control' which has been released before as a single, is a true masterpiece of self-exploration engulfed by electrifying melodies and thunderous rhythms. The journey continues on through pain in which resignation seems like the only option and is portrayed in the most exhilarating way. The waters of solitude start to boil and fuel the fire for 'Break' and 'Empty in which pure aggression turns into art. The band also embraces their French roots in the song 'Synapses' where one verse is delivered in their native language, changing the ambience for a moment and transporting the listener into the world of old Paris. This same song is illustrated with a music video shot on the Eiffel Tower, making **DUST IN MIND** the one and only Metal band to honor this challenge !

With each and every song **DUST IN MIND** climb higher and higher the ladder of unique composing, rich melodies and dark ambience to showcase their iconic personality and relentless determination as a band. 'CTRL' just like the rest of the bands' records, has been produced by no other than Damien Dausch from **PSYRUS STUDIO**, making the sound even more accomplished, mature and established.

Let **DUST IN MIND** take you on a kick ass ride through an emotional rollercoaster!

ABOUT THE BAND

Through their tireless energy, **DUST IN MIND** have spent the past few years growing, experiencing efficiently and is now well and truly established in the European Metal landscape. They deliver a modern/groovy metal illustrated with non-stop videos, new singles and bonus content.

The French band from Strasbourg, formed in 2014 and now represented by Damien Dausch(guitars/ vocals), Jennifer Gervais (vocals), Xavier Guiot (bass), Thomas Marasi (drums) and Philippe Miralles (guitars) is signed on the German label **DARKTUNES MUSIC GROUP**.

And through their own true personality, their highly anticipated fourth studio album, CTRL is not only certification, but the confirmation that the expansion of **DUST IN MIND** is redoubtable. They illustrate it with breathtaking videos, being the **FIRST** metal band to shoot their music video on top of the Eiffel Tower. They are now unstoppable !

DUST IN MIND has had already a big taste of international stages a part of tours through Europe alongside **PAIN, JINJER, ARCH ENEMY, SOILWORK, INFECTED RAIN** and more. Every night, the band won over new fans who are already hungry for next tours.

During the pandemic, the band that “lives” together took its time to put cards on the table, and worked on their sound, and on an album that shows a real commitment. An outlet, an aggressiveness under a veil of humility. Where letting go, self-learning come together, but also the pressure that humans can face, the torrents of emotions that overwhelm our being. This is **DUST IN MIND**.
